An underwater photograph showing a whale's tail and a shark's fin in deep blue water. The whale's tail is on the left, and the shark's fin is on the right. The water is dark blue with some light reflecting off the surface.

WELCOME TO THE WORLD OF ANIMAL REGENERATION

These regenerative products address many animal health problems. They are not only suitable for home treatment, but are also commonly used by veterinary professionals. They are natural, animal- and environmentally-friendly products. They have no negative side effects when the recommendations of the procedures and dosage are followed.

The regeneration method is based on The Five Element Regeneration® concept and is supplemented by the practical experience of veterinary experts.

In addition, the main products bear bioinformation, which in the form of a specific homeopathic for each product complements the effects of herbs and results in a single effective complex. They act on both physical and emotional levels of the body. Before using the main product (concentrate), we recommend consulting with a trained consultant, a veterinarian or the online counselling service available free of charge at www.vet.energy. The auxiliary products complement and enhance the effects of the main The Five Element Regeneration® products and can be freely combined with them and with each other.

TIP

We recommend that you discuss the use of The Five Element Regeneration® herbal concentrates with our consultants.

GYNEVET

THE FIVE ELEMENT REGENERATION® CONCENTRATE

A natural herbal concentrate that stimulates the secretory activity of mucous membranes and tissues (production of hormones, tears, protective mucus of the respiratory tract and colon, joint fluid and articular cartilage, formation of new cells). It activates fat metabolism.

USE

Adaptogen (it accelerates adaptation to new situations or conditions). Harmonisation of the hormonal system, treatment of some chronic skin diseases (alopecia, dry, dull skin, eczema, fungal disease, demodex mites), improvement of hair quality, acceleration of moulting. Prevention of false pregnancy, promotion of milk production, reduction of weight, increase in resistance to parasites, prevention of dry constipation. Prevention of strokes.

A regenerative product with a gradual onset of action. Longer administration is recommended.

KOROVET

THE FIVE ELEMENT REGENERATION® CONCENTRATE

A natural herbal concentrate that stimulates transport functions in the body and blood circulation in the tissues. Harmonisation of the psyche, promotion of joy of life. Suppression of aggression.

USE

Prevention of heart disease. Suitable after heart attack and stroke (to be administered up to 2 days). Convulsions, tics and epilepsy of any origin. Supplementary product for cancer patients. Support of haematopoiesis (stimulation of the spleen pathway according to traditional Chinese medicine [TCM]), pancreatic and nervous system activity as a treatment for weakness. Harmonisation of energies of some liver and gallbladder diseases. Restoration of tissues through increased blood circulation. A geriatric agent.

We recommend caution and consultation with an Energyvet consultant when using Korovet for cardiovascular disease.

REGAVET

THE FIVE ELEMENT REGENERATION® CONCENTRATE

A natural herbal concentrate that optimizes the animal's metabolism. Activation of enzymes, detoxification, elimination of fatigue. Addressing the emotions of fear and anxiety. Prevention of aggression.

USE

Digestive problems, vomiting, insufficient production of enzymes and hormones. Promotion of the appetite. Painful hair syndrome. Osteoarthritis and chronic joint pain (initial product). Connective tissue disorders. Cardiac insufficiency. Chronic renal failure. Inflammation of the urinary tract. Eye diseases. Allergic diseases (alternate with Renovet). Itching. Toxic burden of the body (vaccination, deworming, poor quality food, additives, poisoning).

We recommend caution and consultation with an Energyvet consultant when using Regavet for liver and gallbladder problems.

RENOVET

THE FIVE ELEMENT REGENERATION® CONCENTRATE

A natural herbal concentrate designed to harmonise the mineral and water environment. It maintains optimal pH and electrolyte levels in the body. It has an effect on sadness and works preventively against fear.

USE

Osteoarthritis and degenerative diseases of the musculoskeletal system. Bone mineral supply and fracture healing. Post-traumatic swelling. Strengthening of loose ligaments. Support of liver and gallbladder function. Dissolution of gallstones and urinary stones. Watery diarrhoea. Hot inflammations of the skin (hot spot, acute rashes, hives, seborrhea, inflammation of the ear canal). Tonsillitis. Bronchitis and pneumonia. Allergic conditions (alternate with Regavet).

We recommend caution and consultation with an Energyvet consultant when using Renovet in cases of impaired kidney function (direct regeneration).

VIROVET

THE FIVE ELEMENT REGENERATION® CONCENTRATE

A natural herbal concentrate to increase the physical and mental stamina of the animal. Solution for excessive fixation (on mother, pups or owner). Prevention of sadness.

USE

It stimulates the production of antibodies and overall immunity. Adaptation during periods of stress (weaning, vaccination, transport). Viral diseases, strengthening the mucosal immunity. Acute renal failure with reduced urine production. Acute inflammation of the stomach, pancreas. Inflammation of the nerves (after a cold or triggered by a draught). Excessive maternal care of the young. False pregnancy, reduced milk production. Dissolution of struvite stones. Prevention of urinary stone formation.

Suitable from an early age. It can be combined with any of The Five Element Regeneration products.

ETOVET

A natural herbal concentrate that harmonises mental functions and maintains energy balance. It supports digestion and the use of energy from food. It increases the animal's stamina and endurance.

USE

Animal behavioural disorders. Hyperactivity and lack of concentration. Correction of inappropriate behavioural patterns and habits. Increasing resistance to emotional and psychological influences. Promotion of learning ability. Enhancement of the effect of other products on the psyche. Digestive disorders (bloating, abdominal pain, chronic diarrhoea). Manifested false pregnancy (especially the psychological component).

KINGVET

A natural herbal concentrate that supports motor functions and healing processes of the body.

USE

Wound healing (surgeries, injuries). Muscle development and performance (skeletal, cardiac and abdominal muscles). Supporting the vitality of newborns, the elderly and weakened individuals. Growth of young animals (supporting musculoskeletal development, growth problems). It enhances the effect of training. Bacterial infections of the respiratory tract (cough stage, chronic bronchitis), urinary tract, genital of both sexes. Wound infection, ulcers. Improvement of the condition of the female (uterus, fallopian tubes, ovaries) and male sexual organs (stimulation of libido, sperm production and maturation, ability to impregnate). Diseases of the prostate gland. Incontinence.

To support Kingvet's regenerative and healing effects, we recommend administering along with Imunovet.

IMUNOVET

A pure resin from the Croton lechleri tree. It has tonic, antiviral, antibacterial, antifungal and antioxidant properties. It stimulates the development and maturation of connective tissue. It relieves heat (fever, inflammation). Internal and external application.

USE

It activates haematopoiesis (red blood cells, white blood cells, platelets) and has an effect particularly on the spleen. It stops bleeding. A natural antibiotic. Healing of wounds of all types and inflammation (injuries, post-surgical conditions, bites, hot spot). It pulls wound edges together – it helps to minimize scarring. Restoration of affected tissues during the recovery period. Promotion of functions and responses of the immune system. Severe prolonged infections, resistance of the causative agent to antibiotics. In fever, leukocytosis. Supplementary product for cancer patients.

ANNOVET

A natural extract of *Annona muricata*. It contains acetogenins which cause an energy deficiency in cells with inefficient anaerobic metabolism (some tumour cells, parasites and bacteria).

USE

Strengthening the immune system. Catarrh of mucous membranes. Supportive therapy for cancer patients – cytostatic effects validated in mammary, testicular, and liver tumours. Antiviral, antibacterial, and antiparasitic effects. Bacterial infections. Reduction of microbial load in elderly animals, stimulation of their vitality (a geriatric agent). Harmonisation of the psyche (an antidepressant).

It lowers blood pressure – caution is required when using in patients with cardiac diseases. After prolonged use, it is advisable to restore the intestinal microflora with probiotics (Probiovet).

OMEGAVET

A product containing unique fish oil which is a valuable natural source of many essential fatty acids and vitamins A, D and E. The balanced composition ensures an optimal supply of omega-3 and omega-6 fatty acids.

USE

Building material for cell membranes, nervous system, hormones and cholesterol processing. Safe source of vitamins A, D and E. For shiny hair and healthy, elastic skin. Support for animal cellular immunity – warts, benign tumours, infections (specifically tonsillitis). Overweight, steatosis – fattening of organs. Strengthening of bones, teeth and vision. Beneficial supplement for aging animals. Protective treatment of liver, blood vessels, heart and kidneys. Support of the nervous system.

FYTOVET

A colloidal solution of more than 64 elements in natural form, with a bioavailability of up to 98%. To maintain mineral and electrolyte balance and replenish deficiencies of macro- and microelements. A safe product with no risk of overdose (excess minerals are easily eliminated from the body). Suitable for daily administration.

USE

A source of colloidal minerals. Universal for all animal species. It activates most of the body's enzymes. It reduces fatigue. Recommended for all chronic diseases. Diseases of the digestive tract that inhibit mineral absorption. Skin problems, bird moulting, reptile moulting. A supplementary treatment for poisoning. Disorders of the hormonal glands. It can be used externally against itching and on superficial skin wounds and burns.

AUDIVET

A herbal product for external use. Its composition prevents the growth of unwanted bacteria, fungi and parasites. It has antiviral, antibacterial and antifungal effects.

USE

It has a significant effect on inflammatory conditions affecting mucous membranes and skin. Rashes, eczema and superficial injuries. Skin mycoses, circular alopecia (local hair loss). Warts and small tumours of the skin and mucous membranes. Itching and soreness of the skin, insect bites. Inflammations of the ear canal. Mycoses of the mucous membranes of the genitals (must be diluted). Gum diseases. Pain relief in inflammations of small joints and mammary glands.

! When applied to damaged skin, it stings.

CANNABIVET

A natural product containing CBD for veterinary use. CBD (cannabidiol) helps relieve nervousness in dogs while managing anxiety and stressful situations in general. Works against stomach nausea and improves sleep quality. Suppresses convulsive conditions, including epileptic ones. Relieves chronic pain in cases of musculoskeletal disorders and oncological conditions.

USE

Neurological, digestive problems. Relieves pain in musculoskeletal disorders. Improves fitness and quality of life in elderly animals.

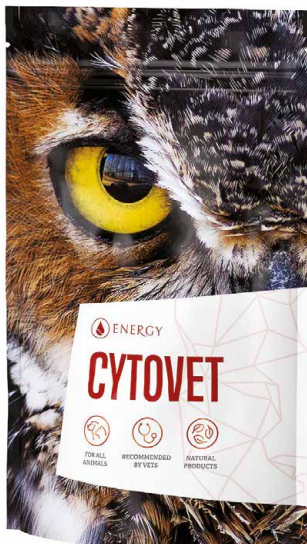

OCUVET

Eye lotion containing herbal ingredients and hyaluronic acid. It is suitable for preventive cleaning as well as for removing secretions and impurities in eye diseases or after surgical procedures. Lowers pH, supports the natural barrier, and nourishes eyelid skin.

USE

Preventive treatment of the eye area. For inflammatory conditions, to remove impurities from the eyelids and the surface of the eye. After eye surgery, to clean secretions and soothe swelling. For dogs who live in dusty areas or for hunting dogs. For allergic conditions and eyelid swelling. For brachycephalic breeds to cleanse skin wrinkles. Hypovitaminosis in turtles and swelling of the eyelids. Herpesvirus in kittens. Dry eye syndrome.

CYTOVET

A detoxifying product containing humates that neutralize and remove toxins from the digestive tract and the entire body.

USE

Prevention of age-related diseases in animals (reduction of the toxic burden on the intestines, liver, kidneys, arthrosis, degenerative diseases). General cleansing of the body. Removal of acid metabolites and reduction of fatigue. First aid for poisoning and alimentary intoxication. Anti-inflammatory effect in the digestive tract – neutralization of inflammatory mediators (diarrhoea and inflammatory diseases of the digestive tract). It creates an unfavourable environment for tumour growth and the formation of metastases. It cleanses purulent processes.

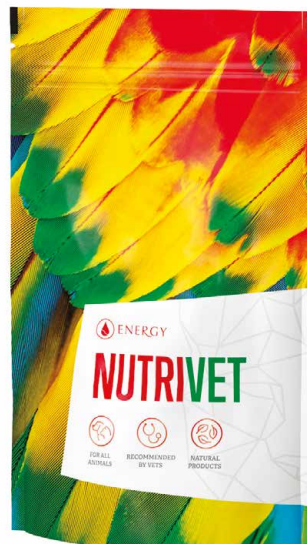

External use: anti-inflammatory effect. Inflammation of the eye, corneal ulcer (must be diluted!!!). Severe inflammation of the ear canal (diluted). Purulent wounds. It can be used for washing, rinses.

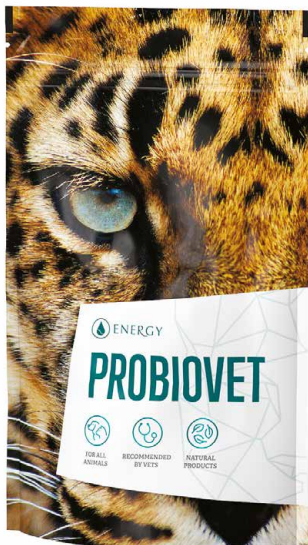

NUTRIVET

A natural product containing an optimally balanced complex of vitamins, minerals and biologically active substances. It nourishes tissues and organs. It strengthens the immune system, increases vitality, and slows down the aging process. It accelerates recovery after illness or surgery.

USE

It activates a variety of enzymes and promotes metabolism. Specific for gastritis – inflammation of the stomach, ulcers of the stomach and duodenum. Hormonal disorders – diabetes, reduced thyroid function. Cardiovascular diseases. Support of haematopoiesis, anaemia. Preparation of females and males for reproduction. Liver regeneration, liver diseases. Previous use of antibiotics, hormonal products. Disorders of nutrient absorption in the intestine, intestinal inflammation. Promotion of healing processes. It improves the condition of elderly animals.

PROBIOVET

A probiotic product containing beneficial strains of intestinal bacteria that enhance each other's growth. Chlorella extract has anti-inflammatory effects and acts as a growth stimulator for the development of beneficial microflora of the colon.

USE

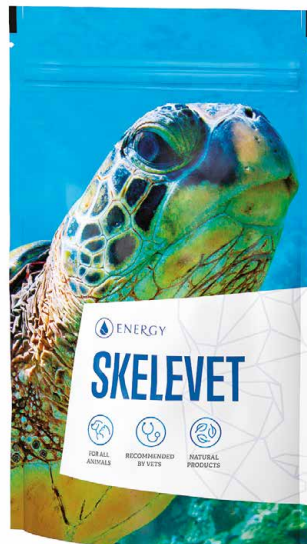

Restoration of the intestinal microbiome. Strengthening the immune system of the whole body. Perverse tastes and eating faeces. Digestive problems, diarrhoea, and bloating. Restoration of the colonic microflora after antibiotic therapy, feeding of food containing preservatives and dietary changes. Reduction of toxic burden of the body (liver and kidney failure, burden from poor quality diet). Recovery.

SKELEVET

A mineral supplement of organic origin with a balanced content of macro- and microelements. A source of collagen. Suitable for all animal species and especially for growing young.

USE

Promotion of bone mineralisation. Prevention and regeneration of juvenile rickets and adult bone softening. Prevention and treatment of musculoskeletal diseases. Inflammation and trauma of joints, joint capsules, tendons and their insertions. Healing of fractures. A beneficial supplement for senior animals. Restoration and regeneration of damaged hair (shine and strength, acceleration of moulting). Growth of the keratin, improvement of its quality (claws, hooves, horns). Prevention and treatment of deformities of shells of turtles, preparation of reptiles for shedding. Bird moulting. Eggshell formation in birds and reptiles.

EPIVET

A non-irritating and non-toxic natural shampoo for routine hair maintenance of all types of animals that tolerate bathing. Neutral pH, soothing effect, also suitable for sensitive skin. The scent is pleasant to humans and animals. It contains thermal water from the Podhajska spring. It has anti-inflammatory and repellent properties.

USE

For routine hair maintenance. It creates a velvety shine and makes the hair stronger. It is suitable for sensitive and irritated skin. For skin inflammations. A repellent against ticks, lice, chewing lice and mosquitoes.

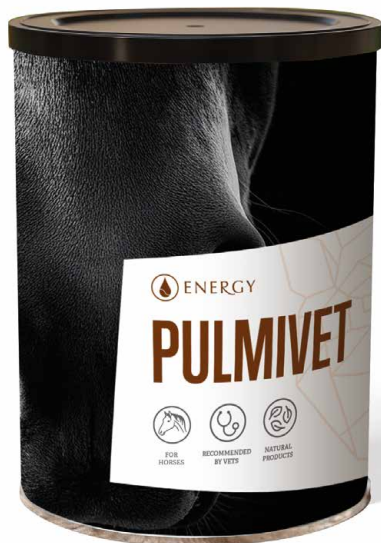

TICKVET

This veterinary product is a completely natural, animal and environmentally friendly product. It contains only selected essential oils that improve the quality of the skin.

USE

It helps reduce the risk of infestation by external parasites (ticks, fleas).

PULMIVET

*Product containing extracts of so-called wood ear (*Auricularia auricula-judae*), umbrella polypore (*Polyporus umbellatus*), couch grass (*Elymus repens*), velvet foot (*Flammulina velutipes*) and Dangshen (*Codonopsis pilosula*). It helps in the treatment of chronic respiratory problems and skin conditions in horses. Pulmivet strengthens the pathway of the lungs and large intestine.*

USE

Asthma. Cough. Chronic respiratory problems (except for conditions with a cardiac etiology). Chronic skin conditions (a supportive medicament for the topical treatment of horses with allergies or that suffer from insect bite hypersensitivity)

ULCEROVET

*Product containing standardized powder from the tops of the *Maytenus ilicifolia* plant, which is beneficial in the treatment of stomach ulcers in horses. Protects the stomach lining from damage by reducing gastric acid secretion and stimulating prostaglandin production. *Maytenus* also has an anti-inflammatory and analgesic effect.*

USE

Treatment of stomach ulcers in horses (reduces gastric acid secretion and stimulates prostaglandin production). When administering painkillers or antibiotics. Preventive administration in the case of stress. When proton pump inhibitors are not sufficiently effective.

VETBALM

Natural ointment for animal paws and claws as preventive treatment of the skin of paws, claws and their beds.

USE

Massage the ointment into the skin of paws and on the surface of claws.

IN OUR PRODUCT
RANGE

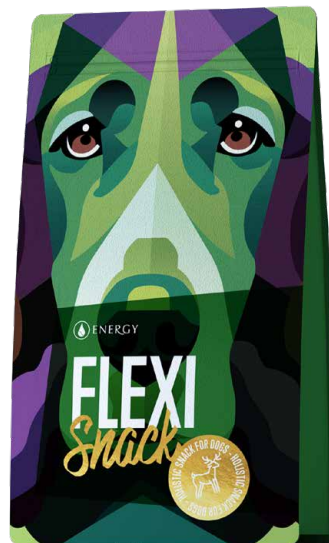

FLEXI SNACK

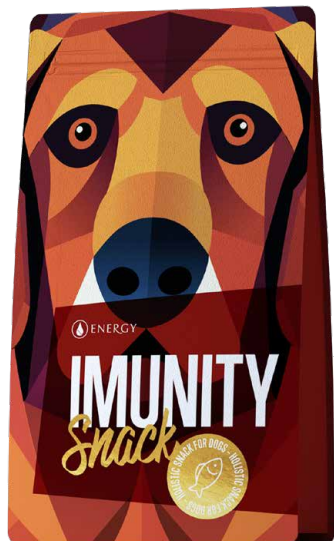

FUNCTIONAL DOG TREATS SUPPLEMENTED WITH
HERBS SUPPORTING THE MUSCULOSKELETAL SYSTEM

Treats containing game meat, coconut flour, dried eggs, fruit, vegetables and shredded coconut. They are made only from fresh and high-quality ingredients and designed as a reward for dogs. These treats not only taste great, but also support a dog's musculoskeletal system with targeted herbs.

USE

Serve as functional treats to support the musculoskeletal system. Treats also serve as a reward to satisfy your dog's taste buds.

IMUNITY SNACK

FUNCTIONAL DOG TREATS SUPPLEMENTED WITH HERBS SUPPORTING THE IMMUNE SYSTEM

Treats containing fish, coconut flour, dried eggs, fruit, vegetables and shredded coconut. They are made only from fresh and high-quality ingredients and designed as a reward for dogs. These snacks not only taste great, but also support the dog's immune system with targeted herbs.

USE

Serve as functional treats to boost the immune system. Treats also serve as a reward to satisfy your dog's taste buds.

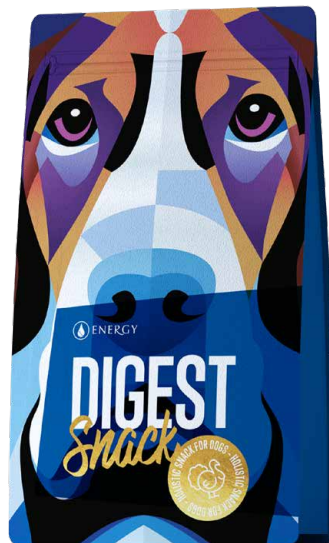

DIGEST SNACK

FUNCTIONAL DOG TREATS SUPPLEMENTED WITH HERBS SUPPORTING THE DIGESTIVE SYSTEM

Treats containing turkey meat, coconut flour, dried eggs, fruit, vegetables and shredded coconut. They are made only from fresh and high-quality ingredients and designed as a reward for dogs. These snacks not only taste great, but also support the dog's digestive system with targeted herbs.

USE

Serve as functional treats to stimulate the digestive system. Treats also serve as a reward to satisfy your dog's taste buds.
