CYTOVET

VETERINARY PRODUCT - CAPSULE

CYTOVET

A regenerative product with exceptional detoxification capabilities. It contains high molecular weight humic acids, succinic acid and silymarin. It is suitable for neutralising or removing toxins not only from the digestive tract but also from the whole body.

FOR ALL
ANIMALS

RECOMMENDED
BY VETERINARIANS

NATURAL
PRODUCTS

USE

(The most suitable auxiliary product for better effect is indicated in brackets)

- » Prevention of age-related conditions in animals (reduction of the toxic burden on the intestines, liver and kidneys, as well as prevention of arthrosis and degenerative diseases) (**Regavet**, **Fytovet**).
- » General cleansing of the body (**Regavet**).
- » Removal of acid metabolites (alkalisation of tissues), reduction of fatigue (**Fytovet**).
- » First aid for poisoning and alimentary intoxication (**Regavet**).
- » Anti-inflammatory effect in the digestive tract – neutralisation of inflammatory mediators (diarrhoea and inflammatory diseases of the digestive system) (**Regavet**).

- 
- » Degenerative and inflammatory diseases of musculoskeletal system (arthritis, arthritis) (**Regavet, Renovet, Kingvet**).
 - » Cancer – it creates an unfavourable environment for tumour growth and metastasis, affects cell division and induction of apoptosis (**Korovet, Regavet, Immunovet**).
 - » It cleans purulent processes, neutralises exotoxin (bacterial infections) (**Imunovet, Kingvet**).
 - » Acceleration of regeneration.

EXTERNAL USE

- » Anti-inflammatory effect.
- » Inflammation of the eye, corneal ulcer (must be diluted!).
- » Severe inflammation of the ear canal (diluted).
- » Purulent wounds (**Imunovet**).
- » Acceleration of wound cleansing under dressing (**Imunovet**).
- » Can be used for washing, rinsing.

COMPOSITION OF 1 CAPSULE

potassium lignohumate (448 mg), gelatin capsule, silymarin (50 mg), succinic acid (2 mg).

RECOMMENDED DOSAGE

Small animals up to 2 kg:

1 capsule daily.

Animals from 2 to 50 kg:

1 to 2 capsules twice daily.

Animals over 50 kg:

1 to 2 capsules for every 50 kg of weight twice daily.

For external use, dissolve the contents of the capsule in cooled boiled water. The concentration of the solution depends on the indication (0.1 to 0.5 liters of water). After three weeks of use, take a one-week break.

RECOMMENDATIONS

It is advisable to moisten the capsule with water or put a on it before

administration for easier swallowing. The capsule can be given in a treat. In case of problems with swallowing, it is advisable to pour the contents of the capsule into the feed or dissolve it in water. For precise targeting of the regeneration, we recommend seeking professional advice from our consultants or the online veterinary advice at www.vet.energy. Use within three months of opening.

WARNING

Do not exceed the recommended daily dose! Ensure sufficient water intake when using the product. Keep out of the reach of children! Cytovet may reduce the effect of certain medicines, e.g. cytostatics and chemotherapeutics.

CONTENTS

90 capsules

Recommendation from a veterinarian

I use **Cytovet** for enteritis, gastritis, colitis in combination with Regavet or Probiovet.

As a supportive product in cancer patients to prolong the life of the animal. In combination with Imunovet for topical treatment of infected wounds and to accelerate healing of large skin defects. The contents of the capsule can be dissolved in 400 mL of water and then used to rinse the eyes; it is effective in the treatment of herpes virus keratoconjunctivitis in cats and various types of conjunctivitis in all animal species.
