

A close-up photograph of a cat's face, focusing on its eyes and nose. The cat has orange-brown fur and striking yellow-orange eyes. A white, semi-transparent text box is overlaid on the right side of the image, containing the product name and description. The background of the text box features a faint, geometric pattern of interconnected lines.

NATURAL  
PRODUCTS

# OMEGAVET

*A product containing unique fish oil, which is a valuable natural source of a range of essential fatty acids and vitamins A, D and E. The balanced composition ensures an optimal supply of omega-3 and omega-6 unsaturated fatty acids. It strengthens immunity, acts as an antioxidant and contributes to overall cell renewal. It supports healthy joints, skin, coat and eyes.*

## USE

(The most suitable auxiliary product for better effect is indicated in brackets)

- » A building material for cell membranes, nervous system, hormone production and cholesterol processing (fatty acids EPA, DHA) (Gynevet).
- » Safe source of vitamins A, D and E
- » For shiny and healthy coat (Gynevet).
- » Support for animal cellular immunity – warts, benign tumours and infections (Gynevet, Virovet, Imunovet, Kingvet).

- 
- » Overweight, steatosis – fattening of the organs (**Regavet, Gynevet**).
  - » Strengthening of bones and teeth (**Renovet, Kingvet**).
  - » Strengthening of eyesight (**Regavet**).
  - » A suitable supplement for ageing animals (**Regavet, Kingvet**).
  - » Protective treatment of liver, blood vessels, heart and kidneys (**The Five Element Regeneration®** concentrate).
  - » Support of the nervous system (**Gynevet, Korovet**).

#### **INGREDIENTS**

sea fish *Engraulis japonicus* oil

(containing eicosapentaenoic acid (EPA) – at least 38%, and docosahexaenoic acid (DHA) – at least 25%) – 99.5%, vitamin E – 0.5%.

#### **RECOMMENDED DOSAGE**

##### **Small animals up to 2 kg:**

1–3 drops 1–3 times daily;

##### **Animals from 2 to 50 kg:**

3–5 drops 1–3 times daily;

##### **Animals over 50 kg:**

5 drops for every 50 kg of weight

1–3 times daily. After three weeks of use, take a one-week break.

#### **RECOMMENDATIONS**

It can be incorporated in a treat

or feed. For precise targeting of the regeneration, we recommend seeking professional advice from our consultants or the online veterinary advice at [www.vet.energy](http://www.vet.energy). Use within three months of opening.

#### **WARNING**

Do not exceed the recommended daily dosage, especially in pregnant females! Ensure adequate water intake while using the product. Keep out of the reach of children! Shake before using!

#### **OBJEM**

30 ml

## Recommendation from a veterinarian

I use **Omegavet** for the treatment of skin diseases with keratinisation disorder, which are accompanied by the formation of scales. I have achieved success in the treatment of atopy; vitamin E and EPA and DHA acids contribute to the increase of immunity, so I also use them in the treatment of demodicosis.
