PROBIOVET

VETERINARY PRODUCT - CAPSULE

FOR ALL
ANIMALS

RECOMMENDED
BY VETERINARIANS

NATURAL
PRODUCTS

PROBIOVET

*A probiotic product containing ten species of live bacteria, the green algae *Chlorella pyrenoidosa* and the prebiotic inulin. It revives the microflora of the large intestine, strengthens the immune system and reduces toxic loads by reducing putrefaction processes in the digestive tract. In the intestine, it exhibits anti-inflammatory effect and soothes irritated mucous membranes. It is suitable for all animal species, especially growing chicks and animals fed with industrial feed.*

USE

(The most suitable auxiliary product for better effect is indicated in brackets)

- » Restoration of the intestinal microbiome.
- » Strengthening the immune system of the whole body (**Virovet, Imunovet**).
- » Perverted appetite, ingestion of faeces (**Etovet**).
- » Bad breath (**Regavet**).
- » Discharge from the eyes discolouring the coat (**Regavet, Cytovet**).
- » Digestive problems, flatulence (**Regavet, Etovet**). Inflammatory diseases of the digestive tract (**Regavet, Imunovet, Cytovet, Kingvet**).
- » Diarrhoea (smelly and pasty) (**Regavet, Renovet, Cytovet**).
- » Presence of blood in the stool (**Cytovet, Imunovet**).
- » Inflammation of the anal glands (**Imunovet, Kingvet**).

- 
- » Restoration of the microflora of the colon after antibiotic therapy.
 - » Feeding with preservative-containing feed (**Regavet**, **Cytovet**).
 - » Switching to other feeds (**Regavet**, **Etovet**).
 - » Reduction of body toxic load (old age, liver failure, kidney failure, burden from poor quality diet) (**Cytovet**).
 - » Recovery (**Regavet**, **Cytovet**).

COMPOSITION OF 1 CAPSULE

Chlorella pyrenoidosa (250 mg), vegetable capsule (HPMC), inulin (48 mg), probiotic culture mixture (2 mg (Bifidobacterium bifidum 3.33×10^7 CFU, Bifidobacterium breve 3.33×10^7 CFU, Bifidobacterium longum 3.33×10^7 CFU, Lactobacillus acidophilus 3.33×10^7 CFU, Lactobacillus casei 3.33×10^7 CFU, Lactobacillus

plantarum 3.33×10^7 CFU, Lactobacillus rhamnosus 3.33×10^7 CFU, Lactococcus lactis subsp. lactis 3.33×10^7 CFU, Streptococcus thermophilus 3.33×10^7 CFU, Lactobacillus delbrueckii subsp. bulgaricus 3.33×10^7 CFU)).

RECOMMENDED DOSAGE

Small animals up to 2 kg:

1 capsule daily.

Animals from 2 to 50 kg:

1 to 2 capsules 1 to 3 times daily.

Animals over 50 kg:

1 to 2 capsules for every 50 kg of weight 1 to 3 times a day.

After three weeks of use, take a one-week break.

RECOMMENDATIONS

For easier swallowing, it is advisable to moisten the capsule with water or put a on it before administration. The capsule can be given in a treat. In case of difficulty swallowing, you can open the

capsule with a gentle pull and pour the contents preferably into the food or treat. For precise targeting of the regeneration, we recommend seeking professional advice from our consultants or the online veterinary advice at www.vet.energy. Use within three months of opening.

WARNING

Do not exceed recommended daily dose! Ensure sufficient water intake when using the product. Keep out of the reach of children!

CONTENTS

90 capsules

Recommendation from a veterinarian

I use **Probiovet** to improve digestion. Its composition helps well against diarrhoea and improves bacterial colonisation of the intestines. Good digestion also means good immune system function.
