FOR ALL
ANIMALS

RECOMMENDED
BY VETERINARIANS

NATURAL
PRODUCTS

SKELEVET

A mineral supplement of organic origin containing unique natural substances (calcium, phosphorus, magnesium, manganese, silicon and other trace elements) ensuring optimal joint and bone nutrition and optimal activity of the muscles and some enzymatic systems. It contains the most favourable ratio of minerals for bone formation. It is suitable for all animal species and especially for growing young.

USE

(The most suitable auxiliary product for better effect is indicated in brackets)

- » Promotion of bone mineralisation (**Renovet, Kingvet**).
- » Prevention and regeneration of growth disorders in young animals, bone softening in adult animals (**Renovet, Kingvet**).
- » It is suitable for elderly animals (arthritis).
- » Prevention and treatment of diseases of the musculoskeletal system of animals (**Regavet, Renovet, Kingvet**).
- » Inflammation and trauma of joints, joint capsules, tendons and their insertions (**Kingvet, Imunovet**).
- » Fracture healing (**Kingvet, Imunovet**).
- » Strengthening the work of muscle tissue (including heart muscle) (**Kingvet**).

- 
- » Supportive agent in the treatment of allergic reactions, insect bites (**Regavet, Audivet, Immunovet**).
 - » Restoration and regeneration of damaged hair (shine and strength, acceleration of moulting) (**Gynevét**).
 - » Growth of horn, improvement of its quality (claws, horn pads, hooves, horns) (**Gynevét**).
 - » Prevention and treatment of turtle shell deformities (**Gynevét, Omegavet**).
 - » Preparation for reptile moulting (**Gynevét**).
 - » Bird moulting (**Gynevét**).
 - » Eggshell formation in birds and reptiles.

COMPOSITION OF

1 CAPSULE

soybean oil, gelatin capsule, cuttlebone powder (105 mg), wetting agent – glycerol, collagen (55.1 mg), fish oil (43.1 mg),

water, nettle stem and leaf extract (18.5 mg), emulsifier – mono- and diglycerides of fatty acids, manganese sulphate (0.6 mg of manganese per capsule), rosehip fruit extract (12.3 mg), beeswax – glazing agent, caramel – natural dye, lecithin – emulsifier.

RECOMMENDED DOSAGE

Small animals up to 2 kg:

1 capsule daily.

Animals from 2 to 50 kg:

1 to 2 capsules twice daily.

Animals over 50 kg:

1 to 2 capsules for every 50 kg of weight twice daily.

After three weeks of use, take a one-week break.

RECOMMENDATIONS

For easier swallowing, it is advisable to moisten the capsule with water or put a on it before administration.

The capsule can be given in

a treat. In case of difficulty swallowing, it is advisable to soften the capsule in warm water, cut or puncture it and squeeze out the contents preferably into the food. For precise targeting of the regeneration, we recommend seeking professional advice from our consultants or the online veterinary advice at www.vet.energy. Use within three months of opening.

WARNING

Do not exceed the recommended daily dose! Ensure sufficient water intake when using the product. Keep out of the reach of children!

CONTENTS

135 capsules

Recommendation from a veterinarian

I use **Skelevet** as joint nutrition in growing animals and in patients with degenerative joint disease (arthritis). Another indication is increased claw brittleness and weakening of the keratin surface of the paw pads, where Skelevet increases the strength, flexibility and resistance of these structures.
