

A close-up photograph of a dog's nose, showing the intricate texture of the skin and the surrounding fur. The nose is dark and has a bumpy, pebbled appearance. The fur is light brown and appears soft. A red, semi-transparent overlay is positioned in the lower right corner of the image, containing white text and a logo. The overlay has a geometric pattern of white lines on its right side.

PRODUCTS

VIROVET

Natural herbal concentrate acting on the organs and tissues of the Metal element in The Five Element Regeneration® concept. It gently works on the lungs, colon and skin. Thus, it harmonises the activity of these organs and their tissues. In general, it increases the resistance and activity of the animal's immune system. It stimulates the activity of kidneys, the urinary tract, genitals and bone tissue (Water element). It reduces the hyperactivity of the spleen, pancreas, stomach, nervous system and mammary glands (Earth element).

USE

(The most suitable auxiliary product for better effect is indicated in brackets)

- » Increasing the resistance of the body in general (**Probiovet**).
- » Promotion of mucosal immunity (prevention of feline viral infections, kennel cough, etc.) (**Imunovet**).
- » Viral infections of the respiratory tract (sneezing stage), skin, nervous system, viral diarrhoea.
- » Stimulation of antibody production (**Omegavet**).
- » Adaptation during periods of stress (weaning, transportation, vaccination) (**Probiovet**).
- » Warts, papillomas of viral origin, sarcoids in horses (**Audivet**).
- » Acute renal failure with reduced urine production, promotion of urine production.
- » Prevention of kidney stone disease, dissolution of struvites (**Fytovet**).

- » Suppression of excessive secretion of gastric juice (**Fytovet**).
- » Inflammation of the gastric mucosa (**Regavet**).
- » Inflammation of the pancreas (**Imunovet**).
- » Inflammation of the nerves (from colds, draughts (**Korovet**)).
- » Reduction of milk production (weaning, drying up, false pregnancy (**Etovet**)).
- » Increasing the resistance to emotional or psychological stress (**Etovet**).
- » Prevention of sadness (**Etovet**, **Korovet**).
- » Excessive maternal care of the young, already manifested false pregnancy (**Etovet**).
- » Reduction of fixation of the animal on the owner and vice versa (**Etovet**).

5 drops (0.3 mL) for every 100 kg of weight twice daily. After three weeks of use, take a one-week break.

RECOMMENDATIONS

For precise targeting of the regeneration, we recommend seeking professional advice from our consultants or the online veterinary advice at www.vet.energy. Use within three months of opening.

WARNING

In advanced pneumonia, colitis and severe skin diseases, take extra care increased caution consult with professional consultants Not suitable for pregnant females.

VOLUME

30 ml

Recommendation from a veterinarian

I find **Virovet** indispensable at the onset of any viral infection when symptoms are limited to sneezing and possibly an elevated temperature. At this stage of the infection, application for only 2 to 3 days is sufficient to successfully manage it. I find further use as the main product in the occurrence of warty skin lesions. Topical application of Audivet in these cases strengthens its effect.
